### Life Sciences Law in Canada, 2nd Edition

Adrienne Blanchard

A unique work in legal literature, **Life Sciences Law in Canada, 2nd Edition** provides a roadmap for protecting the intellectual property associated with marketing medicines, medical devices and natural health products in Canada – for getting them on to the market and for keeping them on the market. All of the legislation and regulations applicable to companies carrying on business in Canada in the life sciences, be they major, established pharmaceutical companies or small, fledgling start-ups, are examined in detail.

Plain language explanations demystify essential regulatory requirements and complex drug, medical device and natural health product legislation in Canada, including the Patented Medicines (Notice of Compliance) Regulations.

**Life Sciences Law in Canada, 2nd Edition** details the patent and trade-mark laws available to protect such products, such as biotechnological innovations, and the enforcement mechanisms for those rights. Constraints on advertising and pricing in the field of pharmaceuticals are also addressed. This edition also includes new chapters on cannabis law, privacy law, and tax issues.

An indispensable resource for the practitioner, this title provides practical information that focuses on actual problems and real issues. Plain English explanations of complex legal regimes and comprehensive appendices provide all the information required at the readers' fingertips.

## Table of Contents

## About the Author

**Adrienne Blanchard** has over 20 years' experience, including in national and global IP practices. In 2015, she founded Blanchard Law, a law practice dedicated to serving the interests of companies in the life sciences, food, and consumer products industries, with a focus on regulatory, IP, and commercial matters.

Her experience includes advising on life sciences regulatory compliance as well as negotiating product distribution and other agreements. She represents clients in matters and before various regulatory bodies including Health Canada, the Patented Medicine Prices Review Board, and the Canadian Food Inspection Agency.
