ELECTRONIC DOCUMENTS

**Bryan Finlay, Q.C.
Marie-Andrée Vermette
Michael Statham**

Release No. 16, March 2018

Electronic data is modifying how lawyers interact, changing how information is collected and used, and transforming our courtrooms. This in-depth resource examines and analyzes the issues relating to electronic documents, including: the sources and types of electronic documents, records management policies, the legal framework governing e-discovery in Canada, the preservation, collection, processing, review and production of electronic documents, and the use of electronic evidence at trial. This dynamic and burgeoning aspect of legal practice is clarified and explained with extensive reference to relevant Canadian and U.S. authorities.

What's New in this Update:

This release adds The Sedona Canada Principles Addressing Electronic Discovery, Second Edition (November, 2015). It also updates **Chapter 2 — Sources and Types of Electronic Documents** related to case law updates, and changes in URLs and technology.

Highlights

The author has reviewed and updated case law, legislative amendments, URLs, and explanations regarding technology as required.

Chapter 2 — Sources and Types of Electronic Documents — New topics have been added to the discussion on Peer-to-Peer technology. A new topic “Blockchain” was added. In this section, the author describes what Blockchain is and provides the latest news on this new technology. The topic “Cryptocurrency” has also been added. This section describes cryptocurrency and provides examples of the technology.
